

Performing Arts Acoustician at Kahle Acoustics - Full-time, French Speaking Position, Brussels -

Kahle Acoustics are acoustics consultants specialising in venues for the performing arts. We are looking for a bright, enthusiastic acoustician to join the team in Brussels, primarily to work on projects in French-speaking countries.

Our projects are located throughout Europe and include concert halls, opera houses, theatres and music schools, ranging from the most prestigious landmark buildings to vital community venues, both new and renovations. Our work is diverse - no two projects are ever the same! - and includes detailed listening to performances and spaces; conceiving the desired sound; discussions with conductors, musicians, directors, artists and building owners; and collaborating with architects, theatre consultants and engineers to integrate exceptional acoustics into beautiful architecture.

You should hold a Masters degree in Physics, Engineering, Acoustics or another relevant subject. We are considering recent graduates and candidates with up to 5 years' experience in room or building acoustics. Fluency in French and the confidence to write formal reports in French will be essential for your work, as will strong maths and physics skills. Our office is multi-lingual (English, French, German, Flemish, Spanish): a second language at native level (ideally English or German) is therefore also a must.

The team at Kahle Acoustics are all musicians and you too should have a strong enthusiasm for music and/or theatre, ideally with performance experience at professional or serious amateur level. We are also extremely active in acoustics research to support our design work and regularly present at conferences. Alongside consulting, you would join in developing new acoustical theories, novel computer and scale modelling techniques and auralisation. Therefore, programming skills in CATT-Acoustic/Odeon, Rhinoceros, Grasshopper, Python, CAD or Matlab would be a big advantage.

If you are interested please send your CV and an introductory letter to info@kahle.be

We look forward to hearing from you!
